

RELATIONS WITH COLLEGES AND UNIVERSITIES

The Board views education as a lifelong process and believes that education is a key element in the realization of a successful and satisfying life; therefore, the Board directs the superintendent and staff to pursue opportunities for the students of the District to be involved in cooperative efforts with colleges and universities. When possible, arrangements should be developed for students to enroll in college and university courses and programs; however, such endeavors should not delay a student's completion of high school graduation requirements.
